Adaptation & Translation of client's marketing package into Chinese

Warning:

This man may not be able to read English!

...

And you probably can't read this:

您不可能大概读此。

Communication is a wonderful thing, if we can understand each other. Many wealthy Chinese have not yet learned how to read, write or speak English. Translation of English into Chinese can often produce unintended, and even embarrassing results. As Dr. Finkelson noted in his book, *How to Find Chinese Investors, Agents & Clients for Your EB-5 Projects & Services - A Practical Guide for Regional Centers, Attorneys, Developers and Businessmen*, "Translating English to Chinese is more difficult than most other languages for two distinct reasons: The Chinese characters are not words. They are pictures. Chinese dialects can differ so significantly that even the best Mandarin translation of the ideas in your message could be completely misunderstood in other dialects, and, therefore, misleading to viewers or listeners."
